GENERAL OFFICES AND MAIL ORDER DEPARTMENT
PLANT CITY, FLORIDA

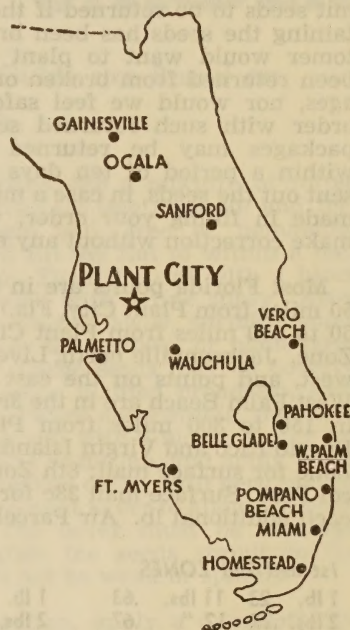

KILGORE'S
BRED-RITE
SEEDS
TRADE MARK

In addition to our large mail order department at Plant City, Florida, we maintain fourteen stores for your convenience, located as indicated on map.

Each of these stores carries a full supply of all flower seeds listed and described in this Flower Guide, and also a complete supply of lawn grass and vegetable seeds, fertilizers, insecticides and fungicides, sprayers and dusters, as well as garden tools and supplies. Everything for the Florida garden.

Important Directions to Customers

By carefully observing the following directions, mistakes and misunderstandings will be very largely avoided.

How to Order—Be careful to sign your name, box number, street or rural route, post office and state on every order. Be sure to tell us your nearest Express or Freight Office should you desire the seed or merchandise forwarded by express, freight or truck line.

Cash With Orders or C.O.D.—Ours is a cash business. Prices are made on that basis. Customers are requested to remit when ordering and by so doing save the C.O.D. fee charged by express companies, banks, and postal authorities for collecting and returning money.

Perishable Items Not Sent C.O.D.—Perishable items such as rose bushes, nursery stock, seed potatoes, etc., are not sent C.O.D. under any circumstances.

How to Send Remittance — Remittances should be made by postal money orders, checks or cash. **PLEASE DO NOT SEND STAMPS.**

Transportation and Sales Tax Charges—Please bear in mind that the postpaid prices indicated in this price list include delivery to any point in Florida.

In making your order do not fail to include the necessary postage when the items you are ordering are not marked "Postpaid."

Often, especially on small packages, you can save money by taking advantage of the lower parcel post rates. If you fail to include postage, we will necessarily have to reduce the order or send "Express or Freight Collect." Also, in order to avoid delay in filling your order, be sure to include with your remittance the proper amount of "State Sales Tax" on non-exempt merchandise as indicated on next page. We are not permitted by law to assume the Sales Tax.

When shipments are to be made by Express or Freight, it is very important to designate your Express or Freight Station.

Prices Subject to Change—The prices in this planting guide supersede all former quotations, including catalog and previous price lists.

This planting guide is printed during the summer. The market on many items of garden and field seeds, as well as supplies, has not been fully established. Consequently, prices on these items indicate value at time these pages are printed. In practically all cases, orders will be filled at prices indicated in this guide. **However, all prices listed are subject to change without notice.** Write for special prices on larger quantities.

IMPORTANT DIRECTIONS TO CUSTOMERS CONTINUED ON NEXT PAGE

Important Directions to Customers Contd.

By carefully observing the following directions, mistakes and misunderstandings will be very largely avoided.

Return of Seeds for Exchange—To safeguard our customers and ourselves we will not permit seeds to be returned if the package containing the seeds has been broken. No customer would want to plant seed that had been returned from broken or opened packages, nor would we feel safe in filling an order with such returned seed. Unbroken packages may be returned for exchange within a period of ten days after we have sent out the seeds, in case a mistake has been made in filling your order, we will gladly make correction without any expense to you.

Most Florida points are in the 1st (within 50 miles from Plant City, Fla.) or 2nd (within 50 to 150 miles from Plant City, Fla.) Postal Zone. Jacksonville north, Live Oak north and west, and points on the east coast south of West Palm Beach are in the 3rd Zone. (Within 150 to 300 miles from Plant City, Fla.) Puerto Rico and Virgin Islands are in the 6th Zone for surface mail; 8th Zone for Air Parcel Post. Surface mail 28c for 1st lb., 12c for each additional lb. Air Parcel Post 80c lb.

1st and 2nd ZONES				3rd ZONE			
1 lb.	.23	11 lbs.	.63	1 lb.	.23	11 lbs.	.75
2 lbs.	.27	12 "	.67	2 lbs.	.29	12 "	.80
3 "	.31	13 "	.71	3 "	.34	13 "	.85
4 "	.35	14 "	.75	4 "	.39	14 "	.90
5 "	.39	15 "	.79	5 "	.44	15 "	.96
6 "	.43	16 "	.83	6 "	.49	16 "	1.01
7 "	.47	17 "	.87	7 "	.54	17 "	1.06

10 "	.59	20 "	.99	10 "	.70	20 "	1.21

If in doubt about your zone rate, obtain it from your postmaster, and be sure to send enough money to cover necessary postage, if the items ordered are not indicated "post-paid" in this catalog. Do not have your order delayed or reduced by failing to add necessary money for postage. If you send too much money, it will be returned to you. It will be found plainly stated above each item whether or not it is postpaid. Also be sure to include with your remittance the State Sales Tax on non-exempt merchandise.

Warranty and Limitation of Liability

We warrant that the seeds, bulbs and plants we sell are, at the time of delivery, as described on the container within recognized tolerances; but we limit our liability on this warranty to the amount of the purchase price of such seeds, bulbs and plants. We give no other or further warranty express or implied.

Notice of any defect or variation resulting from the failure of any seed to be as represented must be given within a reasonable time and not later than 15 days from the time such defect or variation becomes apparent and is observed by the purchaser. THE KILGORE SEED COMPANY. Section 578.26, Florida Statutes.

Sales Tax Information

The Florida Revenue Act of 1949 (Sales and Use Tax) imposes a 3% tax on the retail sales of many commodities. Numerous agricultural supply items are exempt from the tax, and for your guidance in determining tax exempt items shown in this catalog, we list below those items that are not subject to the tax.

EXEMPT ITEMS

Most all Beekeeper's Supplies	Seeds—All Vegetable, Field Crop,
Cans and Jars	Pasture Grasses,
Crate Materials	Onion Sets,
Fencing—For farm use	Seed Potatoes,
Feeds—For farm animals	Seedbed Cloth
Grafting Wax and Rubber Strips	Seed Inoculants
Hotkaps	Seed Treating Compounds
Label Paste	Starter Solutions and
Peat Moss	Root Inducing Materials
Poultry and Stock Remedies	Terra-Lite
Paper Pots—	Tractors
Plant Bands and Flats	Weed Killers

EXEMPT ONLY IF USED FOR COMMERCIAL AGRICULTURAL PURPOSES

Dusters	Fumigants
Farm Tools	Garden Tools
Fertilizers	Raffia and Twine
Insecticides and Fungicides	Rubber Bands
Soluble Plant Foods	Sprayers
	Tarpaulins

All flower seed listed in this Planting Guide is subject to 3% State Sales Tax except sales to Dealers, Government Agencies, Schools, Churches and Charitable organizations provided Tax Exemption Certificate has been obtained from the State Comptroller. All orders from institutions or organizations claiming tax exemption must clearly indicate on order sent us, the certificate serial number and date of certificate.

THE RATE OF TAX APPLICABLE TO NON-EXEMPT SALES IS AS FOLLOWS:

- (1) On single sales of 10c or less no amount shall be added for taxes.
- (2) On single sales in amounts from 11c to 35c, both inclusive, 1c shall be added.
- (3) On sales in amounts from 36c to 65c, both inclusive, 2c shall be added for taxes.
- (4) On sales in amounts from 66c to \$1.00, both inclusive, 3c shall be added for taxes.
- (5) On sales in amounts of more than \$1.00, 3% shall be charged upon each dollar of price, plus the above bracket charges upon any fractional part of a dollar in excess of even dollars.

PLANTING THE FLORIDA FLOWER GARDEN

All Cultural Directions and Information in This Guide are Based on
Florida Growing Conditions.

In Florida, flowers and lawns can be grown every month in the year, since the climate and soils are favorable to the production of the finest gardens and lawns.

A proper soil condition is very necessary for a good garden. It is much easier to make the condition of the soil right at the beginning than to attempt to do the improving as you go along after the flower garden is planted.

In many places the size of the garden is limited and the soil often very poor. The procedure of improving and preparing the soil is really quite simple whether the soil is hard clay or light sand. Well rotted manure and leaf mold or black muck or hammock soil are ideal materials to work into the soil. The easiest and cheapest way is to spade under a thick layer, two or three inches deep, of peat moss (see page 31). This material is clean and easy to handle, and an effective material for breaking up hard soil and making it mellow, or for adding humus to sandy soil, making it more retentive of moisture and fertilizer materials. After the first layer of peat moss has been spaded into the ground, again cover the surface with an inch or two of peat moss, or better, pulverized sheep manure (see page 32), and a liberal application of good garden fertilizer such as Vigoro or Vertagreen (see page 32), applying it at the rate of 4 to 6 pounds per 100 square feet. If these materials are raked into the surface soil 7 to 10 days before sowing seed or setting plants, you have the foundation for an excellent garden.

There are two general methods of sowing flower seeds, the first method is to sow seeds in the open in shaded shallow furrows where the plants are to bloom. Burlap, palm leaves or Spanish Moss may be used for shading, and will also protect seeds from being washed out, covered too deep or packed by heavy rains.

The other and preferred method of starting most flower seedlings is to sow the seeds in flats or shallow boxes, or in muslin or burlap covered seedbeds, where the environment may be more easily and better controlled, than when sown in the open. The flats must have adequate drainage provided by holes in the bottom to allow the free passage of water.

If flats are used, use a mixture of rotted manure or Terra-Lite (see page 30) and fertile, sandy loam soil, free of nematodes (root-knot), and fill the flat to within a half inch of the top. Firm the soil with a block of wood, and soak with a fine spray. After the water has drained away, sprinkle small seeds thinly over the surface, or plant large seeds in rows. Large seeds may be covered by sand, fine seeds planted broadcast, such as Snapdragon, Pansy and Petunia, should be pressed into the soil with a block. Cover the seeds with muslin or burlap, and apply water to the flat or seedbed daily, until germination starts. It is important never to allow the seeds to dry out. The cover must be removed immediately after the seeds sprout so the tiny plants will not be weak or spindly.

After germination, apply a damp-off disease control, such as Arasan (see page 45), following directions on the package. The damp-off control should be used at the first sign of the disease, which causes young seedlings to rot off at the base of the stem. Give as much light as possible and water daily with a fine spray.

Thin the seedlings as they begin to crowd. When the plants have about four leaves and are 4 to 6 inches high set in their permanent location in moist soil on a cloudy afternoon or toward evening, and water the plants thoroughly immediately after setting. They should be shaded during the next few days until they become established. Frequent heavy watering toward evening and bi-monthly applications of a good fertilizer will contribute in a large measure to the success of a garden. Frequent shallow cultivation to keep down weeds, and to loosen the surface soil is also beneficial.

After the plants are established, a light mulch of peat moss, oak leaves or partially rotted grass clippings over the entire soil around the plants will preserve moisture, keep the roots cool, and discourage weed growth.

For thrifty plants producing an abundance of flowers throughout the season, it is an excellent plan to fertilize them lightly every two weeks, using alternately a complete fertilizer such as Vigoro or Vertagreen and one of the soluble fertilizers, Hy-Gro, Hyponex or VHPF "Vip" (see page 32).

FLOWERS FOR SPECIAL USES IN FLORIDA

Recommended for Cutting or Bouquets

Aster	Chinese Forget-me-not	Pansy

If interested in any straight colors, not listed, of any of the following kinds of flowers, write The Kilgore Seed Company, Plant City, Florida, stating your desires and ask us to quote you prices.

AGERATUM—See Floss Flower—Page 13

Alyssum

Of close, compact growth, and even in height, Alyssum makes a desirable Florida winter border or edging plant, covered with tiny flowers which form a compact, showy carpet lasting for months during the winter season, if kept cut back. Set plants in garden or thin to 6 inches apart in 1 foot rows.

LITTLE GEM (WHITE)—Small white flowers completely cover the dwarf, compact plants. Wonderful for edgings, of easy culture and extremely hardy.

Pkt. 15c; 1/8 oz. 30c; 1/4 oz. 55c; 1/2 oz. 80c;
1 oz. \$1.40; 1/4 lb. \$4.75

ROYAL CARPET—This Alyssum is very dwarf, growing only 2 to 3 inches tall and 10 inches across. Makes a sheet of rich, deep blue-purple color and the flowers make a solid mass so thick it's hard to see any green leaves. Ideal for edging paths and flower beds or for mass planting, such as on a hill slope. For continuous bloom shear the full grown plants lightly.

Pkt. 15c; 1/16 oz. 60c; 1/8 oz. \$1.10; 1/4 oz. \$2.00
1/2 oz. \$3.75; 1 oz. \$7.00

Asters

All Wilt Resistant Varieties

Used for cut flowers, bedding and in rock gardens. Sow seed in flats or seedbeds. Set plants in rather rich, well drained soil, protected from too much midday and afternoon sun. All mixtures are a blending of blue, crimson, pink, purple and white.

CREGO MIXTURE—This variety, also called "Ostrich Plume," blooms a few days after the Imperial Mixture. The double blooms are of fine size, have long, shaggy, twisted petals and are borne abundantly on branching plants of robust growth. Plant 18 inches apart in row.

Pkt. 15c; 1/16 oz. 30c; 1/8 oz. 55c; 1/4 oz. 90c;
1/2 oz. \$1.50; 1 oz. \$2.50; 1/4 lb. \$8.00

IMPERIAL MIXTURE—A blending of the best colors Early Beauty Asters. Plant 18 inches apart in row.

Pkt. 15c; 1/16 oz. 45c; 1/8 oz. 75c; 1/4 oz. \$1.25;
1/2 oz. \$2.00; 1 oz. \$3.50; 1/4 lb. \$10.50

POWDERPUFFS (Mixed) — A mixture of bouquet type plants. Grows upright, bearing quilled flowers on long stems at top of plant. Plant 9 inches apart in row. Habit allows whole plant to be cut as one bunch. Very early.

Pkt. 15c; 1/16 oz. 60c; 1/8 oz. \$1.10; 1/4 oz. \$1.85;
1/2 oz. \$3.00; 1 oz. \$5.00

PRINCESS (Mixed) — Compact branching plant, 20 to 24 inches tall. Large blooms having full crested center of small quilled petals with a narrow collar of guard petals. Should be planted 9 inches apart in rows for best results.

Pkt. 15c; 1/16 oz. 60c; 1/8 oz. \$1.10; 1/4 oz. \$2.00;
1/2 oz. \$3.75; 1 oz. \$7.00

Plant of Wilt Resistant Crego Aster

Baby's Breath

Baby's Breath is one of the necessities in every Florida garden where flowers are raised for cutting. It grows rapidly and produces sprays of dainty white flowers and is used extensively for mixing with other cut-flowers of heavier and denser appearance. Does best in rich soil in semi-shade. Sow seed in garden, thinning plants to 18 inches apart in 3 foot rows.

Pure White

Pkt. 15c; 1 oz. 35c; ¼ lb. \$1.00

Bachelor's Button

The Bachelor's Button, or Cornflower, is very easily grown. Finest blues found in the flower kingdom. Our Bachelor's Buttons comprise the double varieties. Blooms freely, must have plenty of sun. Fine for bouquets, and for borders and backgrounds. Plant seed in garden, thinning to 18 inches apart in 2 foot rows.

SKY BLUE—One of the most beautiful and deepest blues in the flower kingdom.

DAINTY MIXTURE—Composed of white, delicate pink, lavender and blue flowers.

Each of the above: Pkt. 15c; ¼ oz. 35c; ½ oz. 60c;
1 oz. \$1.00; ¼ lb. \$3.00

Balsam

Double Camellia-flowered

*Balsam
Double Camellia
Flowered*

Well-known old garden favorite with large, double colored flowers borne in the axils of the leaves, making a most attractive garden display. Sow seeds in flats or seedbeds. They are very easy to grow to 24 inches apart, in a shady spot, for borders or edgings.

SELECTED MIXTURE

—This mixture produces the finest double blooms; colors from pure white to dark purple.

Pkt. 15c; ¼ oz. 50c; ½ oz. 75c; 1 oz. \$1.25;
¼ lb. \$4.00

Blue-eyed African Daisy—Arctotis Grandis

Bean - Scarlet Runner

Plants grow quickly, making strong, climbing plants for shade, with large, showy sprays of attractive bright scarlet flowers. Although grown principally as an ornamental climber for shading, it is also valuable for the beans to eat like string beans when young, or like lima beans when older.

Pkt. 15c; ¼ lb. 35c; 1 lb. \$1.25

Blanket Flower or Gaillardia

These are brilliant daisy-like flowers of yellow, orange, and dark crimson hues, very desirable for cutting and for garden display. Easily grown, require a sandy, moist, well drained soil and a sunny location. Sow seed in garden, spacing plants 18 to 24 inches apart each way.

DOUBLE GAIETY MIXTURE.

Pkt. 15c; ⅛ oz. 35c; ¼ oz. 60c; ½ oz. \$1.00;
1 oz. \$1.50

Blue-eyed African Daisy or Arctotis

A charming flower for cutting as well as for garden display. Plants produce many branches with long-stemmed, pure white daisy-shaped flowers having a blue center and pale lilac-blue shading on the reverse of the petals. It is very effective made up in bouquets with Lupines and Baby's Breath. Plant seeds in garden in 3 foot rows, and thin to 18 inches in the row. Requires a sunny location.

Pkt. 15c; ¼ oz. 35c; ½ oz. 60c; 1 oz. \$1.00;
¼ lb. \$3.50

*Blue Lace Flower or Didiscus***Blue Lace Flower**

A delightful blue annual, growing quickly from seed, producing long-stemmed and clustered heads. Very fine for bedding and for borders, and especially charming as a cut flower. Sow seed in flats or seedbeds, setting plants in garden about 3 feet apart each way.

HEAVENLY BLUE

Pkt. 15c; 1/16 oz. 30c; 1/8 oz. 55c; 1/4 oz. 90c;
1/2 oz. \$1.50; 1 oz. \$2.50; 1/4 lb. \$8.00

Calendula

The Calendula is one of the finest, showiest and free-flowering winter annuals for Florida. It grows quickly from seed, transplants easily, and is not affected by the coldest weather in Florida. Sow seed in flats or in garden. Space the plants 18 inches to 2 feet apart. Ideal for cut flowers and for bedding.

CAMPFIRE IMPROVED — Dark orange, greatly improved.

Pkt. 15c; 1/4 oz. 35c; 1/2 oz. 60c; 1 oz. \$1.00;
1/4 lb. \$3.00

LEMON QUEEN — Lemon-yellow, fringed petals.

Pkt. 15c; 1/4 oz. 35c; 1/2 oz. 60c; 1 oz. \$1.00;
1/4 lb. \$3.00

EXCELLENT MIXTURE—Made up in shades of orange and yellow.

Pkt. 15c; 1/4 oz. 35c; 1/2 oz. 60c; 1 oz. \$1.00;
1/4 lb. \$3.00

ART SHADES MIXTURE—Contains many original and unusual shades of two-tone colors.

Pkt. 15c; 1/4 oz. 35c; 1/2 oz. 60c; 1 oz. \$1.00;
1/4 lb. \$3.00

California Poppy

Beautiful, low-growing, spreading plants of easy culture in a sunny position. Gray-green, fern-like foliage and vivid yellow and orange cup-shaped flowers of varying colors freely produced for many weeks. Do well in any well-drained loose soil. Sow seed thinly in well-prepared beds, where they are to bloom. Cover very lightly. Poppies are difficult to transplant. Make ideal bedding and border plants. Not so desirable for cutting.

GORGEOUS MIXED (Single Flowering) —

A fine mixture that will give a dazzling display.

Pkt. 15c; 1/4 oz. 35c; 1/2 oz. 60c; 1 oz. \$1.00;
1/4 lb. \$3.00

Calliopsis or Annual Coreopsis

Bushy, wiry plants, somewhat similar to Cosmos, with large, loose clusters of yellow and dark crimson flowers, usually with a distinct eye in the center. Requires very little care and yields such a profusion of blooms that they may be cut generously without destroying the beauty of the bed. Plant in groups, borders, or backgrounds, giving plenty of room, 3 to 5 feet apart and a sunny location. Beautiful for cut flowers, bedding and backgrounds.

CHOICE MIXTURE—Choice tall growing varieties. Showy in the garden, and excellent for cutting.

Pkt. 15c; 1/8 oz. 30c; 1/4 oz. 50c; 1/2 oz. 75c;
1 oz. \$1.25; 1/4 lb. \$4.00

*Calendula—Campfire Improved*

Carnation—Charm Mixture—Chabaud's Gaint Improved Strain

Carnation

Improved Giant Chabaud strain, superior to other outdoor type for cut flowers. Each plant produces from 10 to 20 stalks of very large fragrant flowers. Sow seed in flats or seedbeds and transplant, allowing plenty of space, at least 12 to 18 inches for each plant.

CHARM MIXTURE

Pkt. 15c; 1/16 oz. 50c; 1/8 oz. 75c; 1/4 oz. \$1.15;
1/2 oz. \$1.90; 1 oz. \$3.30

Candytuft

Charming clustered heads of daintily colored flowers. Nice for cutting but particularly desirable for bordering walks and flower-beds. Blooms from autumn to spring, preferring the cooler weather. It can be transplanted, but is better if sown where it is to bloom and thinned out to about 12 inches apart in 2 foot rows. Good for rock gardens.

WHITE HYACINTH-FLOWERED—This is an extra select strain. Plant is of sturdy, compact growth, with large spikes of flowers.

Pkt. 15c; 1/8 oz. 30c; 1/4 oz. 50c; 1/2 oz. 75c;
1 oz. \$1.30 1/4 lb. \$4.50

BORDER GROUP (Annual Umbellata)—A mixture of red, pink, lavender, rose and white.

Pkt. 15c; 1/4 oz. 35c; 1/2 oz. 60c;
1 oz. \$1.00 1/4 lb. \$3.25

Celosia (Cockscomb)

Useful for bouquets and bedding in the garden. Sow seed in 1 1/2 to 2 ft. rows during the winter and early spring, and thin to about 12 inches in the row. Easily grown in any soil. Flowers last a long time if dried.

TALL ROYAL VELVET—Comb Type. Large showy, fiery crimson heads or combs, borne well above foliage on robust plants.

Pkt. 15c; 1/16 oz. 35c; 1/8 oz. 60c; 1/4 oz. \$1.00
1/2 oz. \$1.75; 1 oz. \$3.00; 1/4 lb. \$10.00

PAMPAS PLUME—Plume Type. Plume-like and graceful with showy red and yellow feathery flowers.

Pkt. 15c; 1/8 oz. 60c; 1/4 oz. \$1.00; 1/2 oz. \$1.75;
1 oz. \$3.00

Chinese Forget-me-not or Cynoglossum

A beautiful bushy plant, covered with sprays of lovely sky-blue flowers. Used with other flowers for cuttings. Fine for bedding and for rock gardens. Sow seed in garden, thinning to 18 to 24 inches apart.

SKY BLUE

Pkt. 15c; 1/2 oz. 30c; 1 oz. 50c; 1/4 lb. \$1.75

Cleome (Spider Plant)

Plant from February through August. Plants grow 2 to 2 1/2 feet tall. Large trusses of salmon-pink blooms all summer. Excellent for bedding, borders and backgrounds. Stands heat well.

Pkt. 15c; 1/8 oz. 30c; 1/4 oz. 50c; 1/2 oz. 75c;
1 oz. \$1.25; 1/4 lb. \$4.00

Cosmos

Plant from March thru May

Approx. time seed sowing to bloom—2 1/2-3 mos.

Grows about 4 feet high.

Plants covered with finely divided, bright green, fern-like foliage which makes a handsome background for lower growing plants. The blooms are large and double, or single with a crested center. Very desirable for bouquets. The seed germinates easily and quickly. Plant seed 1/4 inch deep. Easy to grow, prefers a sunny location and sandy soil, not too rich. Space plants about 3 feet apart each way.

FIESTA SEMI-DOUBLE — A brilliant, semi-double ruffled flower of golden orange striped with red, borne freely on rather bushy, sparsely foliaged plants. Desirable for bedding, and an excellent plant to grow for cut flowers.

Pkt. 15c; 1/16 oz. 30c;
1/8 oz. 55c; 1/4 oz. 90c;
1/2 oz. \$1.50; 1 oz. \$2.50

Cosmos Choice Mixed

CHOICE MIXTURE—A free blooming double variety in shades of crimson, pink and white.

Pkt. 15c; 1/16 oz. 45c; 1/8 oz. 75c; 1/4 oz. \$1.25;
1/2 oz. \$2.00; 1 oz. \$3.50

Dahlia

Useful for bouquets and bedding. Sow seed in early spring in flats or seedbed and transplant to 12 inches apart in 2 foot rows. Easy to grow from seed. Succeeds best in rich organic soils well supplied with moisture. It is desirable to mulch the bed with leaves.

UNWIN'S BEDDING MIXTURE—Exquisite, semi-double dwarf dahlias in a varied assortment of attractive colors. Early flowering, bushy plants.

Pkt. 15c; 1/16 oz. 35c; 1/8 oz. 60c; 1/4 oz. \$1.00;
1/2 oz. \$1.75; 1 oz. \$3.00; 1/4 lb. \$10.00

Delphinium

(PERENNIAL LARKSPUR)

Useful for bouquets and borders. Sow seed in flats or seedbeds or direct in garden in 3 foot rows and thin or transplant to from 12 to 18 inches in the row. To help germination it is desirable to place seed in moist cloth in the ice compartment of a refrigerator for about forty-eight hours before sowing. A constant moisture supply must be provided. Are used for display and cutting. They do best in cool weather.

BELLADONNA HYBRIDS MIXED—Single flowers of immense size in solid, erect spikes. Highly prized for cutting. This is the best type for Florida. It is important to use only fresh seed.

Pkt. 15c; 1/16 oz. 35c; 1/8 oz. 60c; 1/4 oz. \$1.00;
1/2 oz. \$1.75; 1 oz. \$3.00

Delphinium—Belladonna Hybrids Mixed

Floss Flower or Ageratum

Ageratum is popularly known as the Floss flower. It is a favorite garden cut flower, and for edgings or borders and bedding in Florida. Also useful for rock gardens. Plant grows rapidly, has light green foliage, and many clusters of small, tassel-like flowers. It blooms all summer. Sow seed in flats or seedbed, setting Dwarf Blue Cap 6 inches apart in 1 foot rows, and Purple Perfection 12 inches apart in 2 foot rows.

Ageratum Blue Cap

DWARF BLUE CAP—Dwarf, growing to a height of about six inches. Compact habit, small foliage, and symmetrical dome-like form. The color is a deep, rich, bright blue-lavender.

Pkt. 15c; 1/16 oz. 60c; 1/8 oz. \$1.00; 1/4 oz. \$1.50;
1/2 oz. \$2.50; 1 oz. \$4.50

BLUE PERFECTION—Compact plant, growing to a height of about 18 to 24 inches, covered with True blue flowers. Desirable for cutting.

Pkt. 15c; 1/16 oz. 40c; 1/8 oz. 65c; 1/4 oz. \$1.10;
1/2 oz. \$1.80; 1 oz. \$3.00; 1/4 lb. \$10.50

Globe Amaranth

GOMPHRENA OR

FLORIDA BACHELOR'S BUTTON

This is a popular old-time favorite. Can be used for permanent or dried bouquets like Statice and Strawflower, if cut and hung in a dark room to dry. Very desirable for edgings or borders. Can be depended upon to succeed under almost any conditions in Florida during the summer. Sow seed in flats or seedbed and transplant, spacing 12 inches in row in 2 foot rows.

ASSORTED COLORS

Pkt. 15c; 1/2 oz. 30c; 1 oz. 50c; 1/4 lb. \$1.75

Gourd—Ornamental

Gourds have become esteemed for many uses. The small fancy fruits are of multitudinous shapes, sizes and colors. The fruits are oddly shaped and highly colored. Vines should be supported on a trellis or fence spacing plants about 3 feet apart. The seed should be sown in a well drained, sunny location when danger of frost is passed.

SMALL VARIETIES MIXED

Pkt. 15c; 1 oz. 40c; 1/4 lb. \$1.50

Hollyhock

This type of hollyhock is well adapted to the climatic conditions of Florida. Thrives best on rich, well drained soil, but needs lots of water. Seed should be planted in the garden, spacing 3 feet between rows and 24 inches in the rows. Produces very large (averaging four inches across) single, semi-double and double flowers, pink and dark red in color. Makes an ideal background.

Hollyhock
Annual Indian Spring

INDIAN SPRING (ANNUAL)—Produces a colorful display of double and semi-double rose and pink shades, borne mostly on a central spike. A very colorful mixture. Well suited to Florida.

Pkt. 15c; $\frac{1}{8}$ oz. 35c; $\frac{1}{4}$ oz. 60c; $\frac{1}{2}$ oz. \$1.00;
1 oz. \$1.50; $\frac{1}{4}$ lb. \$5.00

DOUBLE (ANNUAL)

Fripped graceful double blooms in a wide color range. Very fine variety.

Pkt. 15c; $\frac{1}{8}$ oz. 70c; $\frac{1}{2}$ oz. \$2.00; 1 oz. \$3.00

Larkspur

This is the annual form of the always-popular Delphinium, and blooms quickly from seed. The seed should be placed in moist cloth in the ice compartment of a refrigerator for about forty-eight hours before sowing. Larkspur is a cool weather plant, so it is best to wait until November to plant. Seeds will fail to germinate if planted in hot weather. Sow seed $\frac{1}{8}$ inch deep. Water with a fine spray. Thin to stand from 12 to 18 inches apart in 3 foot rows. The young plants are hardy. They like a full sun, plenty of fertilizer, and water.

Larkspur—Regal Finest Mixed

REGAL FINEST MIXED—This is the branching type of Larkspur which has been greatly improved by selecting for doubleness and size of flowers, new colors and better habit of growth. The plants are well branched and produce many long, thick spikes closely set with a large array of Delphinium-like florets of mixed colors, including blues, carmine, rose, white, etc. Showy in beds and lovely for cutting. Vigorous and early.

Pkt. 15c; $\frac{1}{8}$ oz. 30c; $\frac{1}{4}$ oz. 55c; $\frac{1}{2}$ oz. 90c;
1 oz. \$1.50; $\frac{1}{4}$ lb. \$5.00

Linaria (Baby Snapdragon)

Useful for bouquets and bedding. Sow seed in flats or seedbeds, transplanting to garden in 2 ft. rows, 12 inches apart in the row. Makes a free-flowering plant with small spikes of dainty Snapdragon-like flowers. Long blooming, resists frost, and well adapted to Florida.

NORTHERN LIGHTS—An improved, taller growing Linaria. Very spectacular with wide range of color including darker shades.

Pkt. 15c; $\frac{1}{8}$ oz. 30c; $\frac{1}{4}$ oz. 55c; $\frac{1}{2}$ oz. 80c;
1 oz. \$1.40

Lupine

Plants make decorative, palm-like foliage and stems covered with bristly hairs. Flowers are pea-shaped, borne in spires of varying length. Desirable for cutting and bedding. Also makes good backgrounds. Thin the plants to 12 inches apart in 3 foot rows. They will grow in comparatively poor soil, but they like full sun. Will flourish in partial shade but require an abundance of water during the blooming season.

TALL ASSORTED COLORS

Pkt. 15c; $\frac{1}{4}$ oz. 35c; $\frac{1}{2}$ oz. 60c; 1 oz. \$1.00;
 $\frac{1}{4}$ lb. \$3.00

DWARF PIXIE DELIGHT—Uniformly dwarf, growing 8 inches tall. Valuable as a border plant. Complete range of Lupine colors.

Pkt. 15c; $\frac{1}{8}$ oz. 50c; $\frac{1}{4}$ oz. 75c; $\frac{1}{2}$ oz. \$1.25;
1 oz. \$2.00; $\frac{1}{4}$ lb. \$6.75

MARIGOLD

MARIGOLDS ARE MOST DESIRABLE FOR SUMMER FLOWER GARDENS IN FLORIDA

*Marigold—Crown O' Gold
(Collarette type)*

The attractive plants, with fern-like foliage, produce gigantic, double, frilled flowers. They make a splendid garden show, the dwarf types for bedding and edging, the tall types for backgrounds. All types are magnificent when cut for bouquets. Marigolds withstand heat and drouth, thriving where many plants would perish, free from pests and are easy to grow.

GIGANTEA SUNSET GIANTS MIXTURE—

This tall 3½ foot, free flowering Marigold is the largest flowered of all Marigolds. Very showy. The most remarkable feature is the delicate sweet fragrance of the blossoms. The stems are long and the flowers of startling bold colors of varied shades of lemon-yellow to gold-orange, are excellent keepers after cutting.

Pkt. 15c; ⅛ oz. 35c; ¼ oz. 60c; ½ oz. \$1.00;
1 oz. \$1.50; ¼ lb. \$5.00

*Marigold
Dwarf Gigantea
Pot O' Gold*

DWARF GIGANTEA

POT O' GOLD — A dwarf, sweet scented counterpart of Gigantea type. Plants are dwarf and compact, 12 to 15 inches in height. Flowers are double, deep golden-orange. Early and free blooming. Useful for bedding cut flowers, edging and borders.

Pkt. 15c; ⅛ oz. 30c; ¼ oz. 50c; ½ oz. 75c;
1 oz. \$1.25; ¼ lb. \$4.00

DWARF FRENCH DOUBLE HARMONY—

An excellent dwarf French Marigold, growing to a height of about 12 inches. Scabious-flowering with a bright golden-yellow center, bordered with a dark maroon-brown color. Plants are of bushy habit and form excellent material for bedding and edging or borders.

Pkt. 15c; ⅛ oz. 30c; ¼ oz. 50c; ½ oz. 75c;
1 oz. \$1.25; ¼ lb. \$4.00

EXTRA-DWARF DOUBLE MIXED—An excellent mixture of free flowering dwarf double varieties. Large, exquisite blooms in orange and yellow, as well as combinations of these colors. Should be grown in soil not overly rich, otherwise plants may produce an over-abundance of foliage and a scarcity of flowers. Plants grow 10 to 15 inches tall.

Pkt. 15c; ⅛ oz. 30c; ¼ oz. 55c; ½ oz. 80c;
1 oz. \$1.40; ¼ lb. \$4.75

LEMONDROP—Canary yellow, full double, free blooming. Plants grow eight to nine inches high.

Pkt. 15c; ⅛ oz. 30c; ¼ oz. 50c; ½ oz. 75c;
1 oz. \$1.25; ¼ lb. \$4.00

CROWN O' GOLD (collarette)—Flowers are bright golden-orange color, having a collar of big, wide, drooping petals. Plants grow about 2 to 2½ feet tall, bloom early and for a long period. Beautiful in the garden and excellent for cutting. The only Marigold with odorless foliage with fragrant flowers.

Pkt. 15c; 1/16 oz. 30c; ⅛ oz. 50c; ¼ oz. 75c;
½ oz. \$1.25; 1 oz. \$2.00; ¼ lb. \$6.75

GLITTERS — Chrysanthemum Flowered—

Large, fluffy, bright canary yellow chrysanthemum-like flowers. Makes a bushy, compact, erect and free flowering plant with long strong stems.

Pkt. 15c; ⅛ oz. 50c; ¼ oz. 75c; ½ oz. \$1.25;
1 oz. \$2.00; ¼ lb. \$6.75

REAL GOLD—Very large carnation type blooms; pure gold color, plants very uniform, 20 to 24 inches high.

Pkt. 15c; 1/16 oz. 30c; ⅛ oz. 50c; ¼ oz. 75c;
½ oz. \$1.25; 1 oz. \$2.00; ¼ lb. \$6.75

YELLOW SUPREME—Very free flowering, compact, and somewhat pyramidal in habit, blossoms. The color is a cream lemon-yellow. The golden-yellow petals fairly glow and sparkle.

Pkt. 15c; 1/16 oz. 30c; ⅛ oz. 50c; ¼ oz. 75c;
½ oz. \$1.25; 1 oz. \$2.00; ¼ lb. \$6.75

Be Sure To Include State Sales Tax When Ordering Flower Seed

Morning Glory

Improved Ipomea

This is the favorite quick growing vine with large showy attractive blossoms for shading porches, covering trellises and fences. Sow seeds after frost, when soil is warm. Germination may be hastened by cutting or filing through the hard outer shell and soaking in warm water for twenty-four hours before planting.

SCARLETT O'HARA (Red)—Huge scarlet flowers, 3½-4 inches across, borne profusely on vigorous climbing vines.

Pkt. 15c; ¼ oz. 35c; ½ oz. 60c; 1 oz. \$1.00;
¼ lb. \$3.00

PEARLY GATES (White)—The large flowers (4 inches across) are a lovely lustrous white, and literally cover the vigorous, fast growing vines.

Pkt. 15c; ⅛ oz. 30c; ¼ oz. 50c; ½ oz. 75c;
1 oz. \$1.25; ¼ lb. \$4.00

HEAVENLY BLUE IMPROVED (Blue)—The large deep blue flowers stay open late in the day.

Pkt. 15c; ¼ oz. 35c; ½ oz. 60c; 1 oz. \$1.00;
¼ lb. \$3.00

Mourning Bride or Scabiosa

The showy, fragrant flowers of Scabiosa are borne on long, graceful stems over a long

season. The colors are rich and varied—pure white, pink, yellow, blue, purple, red and variegated shades. As cut-flowers they are unsurpassed, and they will last a week or more if cut before they have entirely opened. Plants should be set out, or thinned out to stand 1 foot

Scabiosa Sunrise Mixture apart in 3 foot rows in any good garden soil. Also useful for bedding.

SUNRISE MIXTURE

Pkt. 15c; ⅛ oz. 35c; ¼ oz. 60c; ½ oz. \$1.00;
1 oz. \$1.50; ¼ lb. \$5.50

Nasturtium

The nasturtium is very easily grown, and succeeds best in rather dry, sandy or gravelly, well-drained but well fertilized soil. The large, double and semi-double, sweet-scented flowers are valuable for cutting. Also useful

Nasturtium—Semi-Double Golden Gleam

in rock gardens. The plants have a long blossoming period (3-4 months) provided the flowers are kept picked off before seed is formed. Flowers are borne on long stems, well above the foliage, making them very attractive for bedding plants and as cut flowers for bouquets. Soaking seed in water over night before planting in moist soil helps germination. Plant seed in 3 foot rows and thin to 12 inches in the row. If covered on cold frosty nights, plants will grow and bloom all winter.

Nasturtium Varieties

SEMI-DOUBLE MAHOGANY GLEAM — Large blooms, rich mahogany-red color. Very fine for cutting.

SEMI-DOUBLE GOLDEN GLEAM—Large, deep golden-yellow, sweet-scented blooms, 2½ to 3 inches across, borne on long stems (5 to 6 inches long) well above the foliage. A blaze of intense, gleaming, golden-yellow color when in full bloom.

SEMI-DOUBLE SCARLET GLEAM — The flowers are a fiery orange-scarlet, and of immense size, almost three inches across. The plants bear the numerous semi-double with some single flowers well above the foliage on long stems.

SEMI-DOUBLE GLEAM HYBRIDS — The hybrids are a collection of gorgeously colored, large, well formed flowers of dazzling beauty. A very brilliant mixture of an amazing range of showy colors. There are a few singles among the blossoms, although mostly double and semi-double.

SEMI-DOUBLE DWARF GEM MIXTURE—Dwarf, compact, bushy or globular plants about one foot high. Blooms are double, sweet-scented of excellent color range. Most attractive for beds, borders and pot culture.

Prices on each of the above:
Pkt. 15c; 1 oz. 35c; ¼ lb. \$1.00; 1 lb. \$3.00

Giant Pansy

Pansies are the most ideal of all flowering plants for edging or for bedding in late winter and early spring. The pansy is distinctly a cool weather plant, and for a long blooming period it should be grown in cool weather and in a cool location. Seeds will not germinate well in hot weather and young plants are sickly and slow growing in the warmth of late summer. Fresh seeds should be sown very shallow in flats or in well prepared seedbed soil in a shaded place in late fall. Transplant seedlings 12 to 18 inches apart, giving some shade and plenty of water.

ENGELMANN GIANT MIXTURE—This is the largest flowered pansy ever introduced. Flowers have thick, velvety petals, borne on long stems, and are of most striking brilliance and endless variety of color and design.

Pkt. 15c; 1/16 oz. \$2.50; 1/8 oz. \$4.50; 1/4 oz. \$8.00

Engelmann Giant Pansy

PETUNIA

ONE OF THE BEST AND FINEST ANNUALS FOR GENERAL PLANTING IN FLORIDA

Petunias are the most colorful of annual garden flowers. They will grow in practically any soil and require very little attention after they are established.

The culture of petunias is simple and quite easy, although many amateurs find them somewhat difficult to start, due to the fact that they cover the seed too deeply. Whether sown directly in the garden, or as is generally recommended in flats or seedbeds, **the seeds must not be buried**. The very small seeds should be broadcast thinly on a well-prepared

seedbed, pressed into the soil, and then covered very lightly to a depth of not more than 1/16 to 1/8 of an inch, using sand or better, sand mixed with peat moss or humus. The moisture content must be kept uniform until the seeds have sprouted, and the beds should never be allowed to dry out after seeds are sown. It is best to start seedlings in a flat or seedbed in all cases, where moisture conditions can be controlled. The seedbeds should be covered with moist burlap or muslin until sprouts appear, when this shading material should be removed immediately.

When the seedlings are well grown in flats or seedbeds, transplant to the garden or border, setting plants in rows 2 to 3 feet apart and 12 to 18 inches in the row. Petunias do best in moderately rich, well drained, moist soil. Since they grow and bloom over long periods they require a lasting fertilizer like pulverized sheep manure (see page 31). In transplanting, set plants the same depth they were before. If they have sent up a center shoot, it should be pinched to induce branching and make a more compact plant form.

Petunia—Carnival (F₂ Hybrids)

CARNIVAL (F₂ Hybrids). This new hybrid petunia has attracted great attention wherever grown. The vigorous plants are bedding type. Blooms are large, with fringed and ruffled petal edges, also some smaller plain edged flowers. Colors include blue, white, crimson, rose, scarlet, salmon and cream-pink in solid colors; also some bi-colored. This variety exceeds anything of its type yet shown in vigor of growth, and range of color. Very free blooming.

Pkt. 15c; 1/16 oz. \$3.00; 1/8 oz. \$5.50; 1/4 oz. \$10.00

PETUNIA—(Continued)

Fluffy Ruffles Petunia

Grows 15 to 18 inches high.

These are among the most beautiful petunias and well worth the ambition of everyone to produce. The huge blossoms are wonderfully fringed and ruffled and range bewilderingly through shades of pink, blue, scarlet, lavender, crimson, purple, white, and intermediate hues, markings, and curious blotches. The flowers measure 3 to 4 inches across when properly grown. Suited for bedding purposes, pot culture and for cutting, as well as for porch and window boxes. Sow seeds carefully.

Pkt. 15c; 1/16 oz. \$3.00; 1/8 oz. \$5.50;
1/4 oz. \$10.00

Dwarf, Erect Plain Petaled Petunias

Grow 6 to 12 inches high.

ROSY MORN—Dwarf, compact, constantly blooming plants with small, brilliant, rose colored flowers with white centers.

Pkt. 15c; 1/16 oz. 60c; 1/8 oz. \$1.10; 1/4 oz. \$2.00;
1/2 oz. \$3.75; 1 oz. \$7.00

Plain Petaled Petunias

Grow 15 to 18 inches high

SNOW QUEEN—Large, pure white flowers borne on plants of compact growth.

Pkt. 15c; 1/16 oz. 60c; 1/8 oz. \$1.10; 1/4 oz. \$2.00;
1/2 oz. \$3.75; 1 oz. \$7.00

Petunia—Superb Mixture

Petunia

HEAVENLY BLUE — Plant is dwarf in growth. Flowers are a beautiful light blue. Entirely distinct.

Pkt. 15c; 1/16 oz. 75c; 1/8 oz. \$1.25; 1/4 oz. \$2.25;
1/2 oz. \$4.25; 1 oz. \$8.00

FIRE CHIEF—A free-flowering Petunia of most brilliant color of true scarlet-red, turning to a deep salmon-rose with age. Plants vigorous and upright, flowering over a long season of bloom.

Pkt. 15c; 1/16 oz. \$1.75; 1/8 oz. \$3.25; 1/4 oz. \$6.25

SUPERB MIXTURE—A well selected blend of the finest types and deepest, richest color of the single plain petaled, tall growing petunias.

Pkt. 15c; 1/16 oz. 45c; 1/8 oz. 75c; 1/4 oz. \$1.25;
1/2 oz. \$2.00; 1 oz. \$3.50; 1/4 lb. \$10.00

HOWARD STAR IMPROVED — Crimson maroon flowers with a clearly defined star of pure white.

Pkt. 15c; 1/16 oz. 60c; 1/8 oz. \$1.10; 1/4 oz. \$2.00;
1/2 oz. \$3.75; 1 oz. \$7.00

ELK'S PRIDE (Elk's Purple)—The flowers give one the impression of looking at a piece of rich purplish velvet. Remarkably rich and even tone is carried over the entire surface of the flower.

Pkt. 15c; 1/16 oz. \$3.00; 1/8 oz. \$5.50; 1/4 oz. \$10.00

FLAMING VELVET. (Velvet Red)—Deep, velvety blood-red. Very beautiful and showy.

Pkt. 15c; 1/16 oz. 60c; 1/8 oz. \$1.10; 1/4 oz. \$2.00;
1/2 oz. \$3.75; 1 oz. \$7.00

Phlox

Blooms practically all year. Seed should be chilled in moist cloth in the ice compartment of a refrigerator for 36 to 48 hours before sowing. Plant in garden about $\frac{1}{4}$ inch deep, and transplant seedlings or thin to 6 inches apart in 2 foot rows. Grows easily in most any type of soil, but likes plenty of water and sunshine. Excellent for bedding in gardens and for planting in barren places, and for beautifying vacant lots and roadsides, and for bordering gardens. Also valuable for rock gardens. Phlox is relatively free from pests. Transplants easily.

PENINSULAR MIXTURE

Pkt. 15c; $\frac{1}{16}$ oz. 30c; $\frac{1}{8}$ oz. 55c; $\frac{1}{4}$ oz. 90c;
 $\frac{1}{2}$ oz. \$1.50; 1 oz. \$2.50; $\frac{1}{4}$ lb. \$8.00; 1 lb. \$30.00

Phlox—Peninsular Mixture

DWARF NANA COMPACTA MIXTURE—

Grows 6 to 8 inches tall: Of dwarf, compact growth. Fine for low bedding and for borders and edging. Complete color range.

Pkt. 15c; $\frac{1}{16}$ oz. 75c; $\frac{1}{8}$ oz. \$1.25; $\frac{1}{4}$ oz. \$2.00;
 $\frac{1}{2}$ oz. \$3.50; 1 oz. \$6.00; $\frac{1}{4}$ lb. \$22.00

Pinks—Chinese or Dianthus

*Dianthus
Sweet Wivelsfield*

The Dianthus, or Chinese Pinks, are extremely popular because of their varied and lovely rich coloring. The flowers produce in clusters. They are hardy, heat resistant and do well in Florida. Fine for massing, bordering, and cut-flowers. Plant seed about 6 inches apart in 2 foot rows.

MEDAL MIXTURE — Double-Flowered —
Composed of a mixture of colors.

Pkt. 15c; $\frac{1}{8}$ oz. 30c; $\frac{1}{4}$ oz. 50c; $\frac{1}{2}$ oz. 75c;
1 oz. \$1.25; $\frac{1}{4}$ lb. \$4.00

SWEET WIVELSFIELD — Double mixed.
Large, semi-double or double sweet-scented flowers. Includes many fine colors.

Pkt. 15c; $\frac{1}{8}$ oz. 35c; $\frac{1}{4}$ oz. 60c; $\frac{1}{2}$ oz. \$1.00;
1 oz. \$1.50; $\frac{1}{4}$ lb. \$5.00

Pinks

SINGLE GAIETY MIXED — Large, many fringed flowers. Colors range from pure white to crimson and are attractively zoned. Excellent for cutting and bedding.

Pkt. 15c; $\frac{1}{8}$ oz. 30c; $\frac{1}{4}$ oz. 55c; $\frac{1}{2}$ oz. 80c;
1 oz. \$1.40; $\frac{1}{4}$ lb. \$4.75

Portulaca

(See Sun Plant Page 21)

Queen Anne's Lace Flower

Queen Anne's Lace Flower has large heads made up of tiny white flowers, giving it a lace-like appearance. The flower clusters are borne on long stems which make this flower very suitable to mix with other cut flowers, giving the bouquet an airy appearance. Plant at least two feet apart in 4 foot rows as crowding stunts the growth of the plants. Valuable for backgrounds.

Pkt. 15c; $\frac{1}{4}$ oz. 35c; $\frac{1}{2}$ oz. 60c; 1 oz. \$1.00;
 $\frac{1}{4}$ lb. \$3.00

Salvia

BONFIRE—This early, tall, and erect strain is extremely uniform in both color and plant habit. Suitable for both bedding and borders of medium height. The plants bear spikes of very showy, intense scarlet flowers and make attractive bouquets. Sow seed in flats or seedbed, transplanting to 3 foot rows, 18 inches in the row.

Pkt. 15c; $\frac{1}{16}$ oz. \$1.00; $\frac{1}{8}$ oz. \$1.75; $\frac{1}{4}$ oz. \$2.75;
 $\frac{1}{2}$ oz. \$4.75

Shasta Daisy

SINGLE AND SEMI-DOUBLE GIANTS—

Beautiful flowers of pure glistening white, with bright yellow centers, growing about 50% double. The singles are exceedingly large in size, averaging three to four inches in diameter. Useful for cut flowers, and bedding. Sow seed in garden spacing 12 to 15 inches apart in 3 foot rows. Very hardy, but requires plenty of water.

Pkt. 15c; 1/16 oz. \$1.25; 1/8 oz. \$2.25; 1/4 oz. \$4.00

*Snapdragon—Giant Mixture
(Rust Resistant)*

Snapdragon or Antirrhinum

GIANT SNAPDRAGONS—Successful only when grown through the winter and early spring months. The seeds are small and slow to germinate. They should be planted in a shallow box or seedbed of rich soil, in a cool, shady place and kept continuously moist until seeds sprout. Protect from ants. When 4 inches high, young plants may be transplanted in rich, moist soil 1 foot to 18 inches apart in rows 3 feet apart. As soon as the plants reach 8 inches in height they should be tied to light stakes until the side branches are well developed. Do best in rich loamy, well-drained soil with plenty of water. Most useful as cut flowers, as well as bedding.

GIANT MIXTURE. (Rust Resistant).—This is a blend of the finest, outstanding shades of the tall growing (2 to 3 feet) type. Invaluable for cutting.

Pkt. 15c; 1/16 oz. 35c; 1/8 oz. 60c; 1/4 oz. \$1.00
1/2 oz. \$1.75; 1 oz. \$3.00; 1/4 lb. \$10.00

GIANT RUFFLED "TETRAPLOID" MIXTURE—Large and attractive ruffled flowers in many colors and bicolors, some veined. Tall, erect plants (2½ to 3 ft.); strong and husky, with thick, dark green glossy foliage. Very long spikes.

Pkt. 15c; 1/16 oz. \$1.00; 1/8 oz. \$1.50; 1/4 oz. \$2.50;
1/2 oz. \$4.50; 1 oz. \$8.00; 1/4 lb. 30.00

Statice

Slender, wiry, bushy plants, bearing masses of flowers in delicate shades of lavender, rose, blue and white. Valued for drying, and makes an excellent long-lasting flower for bouquets, also attractive bedding plant. Sow seeds in the garden in 3 foot rows and thin to 18 inches in the row. Very easily grown. Requires sunny location.

ASSORTED COLORS

Pkt. 15c; 1/2 oz. 30c; 1 oz. 55c; 1/4 lb. \$1.50;
1 lb. \$5.50

SINGLE COLORS—Blue, Rose, Lavender, White or Yellow

Pkt. 15c; 1/2 oz. 35c; 1 oz. 60c; 1/4 lb. \$1.75;
1 lb. \$6.00

Strawflower or Helichrysum

Large, showy flowers of straw-like texture which retain their brilliant colors when dry, making them useful for decorative bouquets. The seed should be sown where plants are to bloom in 3 foot rows, and thinned out 18 inches apart. When drying for preservation, cut with long stem before the blossoms open completely, and hang in the shade, with their heads down, so that the stems will dry straight. Plants grow 4 to 6 feet high and make a showy background.

*Helichrysum
Or Strawflower*

MANY COLORS—A mixture containing fiery red, canary, silver, rose, salmon, and blue.

Pkt. 15c; 1/16 oz. 30c; 1/8 oz. 50c; 1/4 oz. 75c;
1/2 oz. \$1.25; 1 oz. \$2.00; 1/4 lb. \$6.75

Helianthus (Sunflower)

Easily grown and does best in a sunny location, it being a heat tolerant annual. Fine background for lower plantings, or can be grown in clumps. Successive sowings of seed can be made for cutting during the months of May thru September. Thin plants to 2 feet apart in 3 foot rows.

SUNSHINE MIXTURE — Single; Zoned bronze and red shades.

SUNGOLD—Brilliant golden yellow, flowers large and double, plants uniform height 3½ to 4 ft.

Pkt. 15c; ⅓ oz. 35c; ¼ oz. 60c; ½ oz. \$1.00;
1 oz. \$1.50; ¼ lb. \$5.00

Portulaca (Sun Plant)

Blooms all summer in Florida

A creeping, succulent plant, with odd, thick, fleshy stems and small, quill-shaped leaves, about 6 inches high, which thrives in sunny locations. Produces large, waxy flowers of varying colors which open only in sunshine early in the morning. It is excellent for edgings or borders and for rock gardens. The seed is very fine; sow it thinly where plants are to grow, and do not cover. May be thinned 10 to 12 in. apart in 1 ft. rows.

DOUBLE- MIXED

Pkt. 15c; 1/16 oz.
60c; ⅓ oz. \$1.10; ¼
oz. \$2.00; ½ oz.
\$3.75; 1 oz. \$7.00

*Portulaca
Double Mixed*

Sweet Peas Early Flowering Spencer

The Early Flowering Spencer varieties are heat resistant and best adapted for Florida soil and climate. Sweet Peas do best in cool weather. They are heavy feeders and need very rich soil. Plant seeds one inch apart and cover two inches deep. When plants are five inches high, thin to three or four inches apart and furnish wire support for vines to run upon. Fertilize and water frequently. Keep flowers cut off every day to prevent seed pods forming and to prolong the blooming period. Sunshine and fresh air are very essential.

MRS. HERBERT HOOVER—Bright blue.

MARS—Bright Crimson Red.

Rainbow Mixture Sweet Peas

SHIRLEY TEMPLE—Rich Pink.

HOPE—Pure White.

LAVANDA—Pure Clear Lavender.

BALL'S ORANGE IMPROVED — Deep Orange.

Prices on each of the above:

Pkt. 15c; ½ oz. 35c; 1 oz. 60c; ¼ lb. \$1.75;
½ lb. \$2.60; 1 lb. \$5.00

RAINBOW MIXTURE—Sweet Pea

Assortment of all popular shades of giant Early Flowering Spencer varieties.

1 oz. 45c; ¼ lb. \$1.10; ½ lb. \$1.85; 1 lb. \$3.50

**ZVOLANEK'S MULTIFLOWERED
MIXTURE**—SWEET PEA

Vigorous and unusually free-flowering. On very long, strong stems, with many stems carrying 4 to 5 large flowers instead of the usual three or four smaller florets. This sweet pea is excellent for Florida.

Pkt. 15c; ½ oz. \$1.00; 1 oz. \$1.50; ¼ lb. \$5.00;
½ lb. \$9.50; 1 lb. \$18.00

Tithonia or Florida Sunflower

Make ideal cut flowers, and useful for backgrounds, and to plant in shrubbery bays. Must have plenty of sun and a fertile soil. Plant seed in the garden and space plants 3 to 4 feet apart.

TORCH—A bushy type with single, bright orange and scarlet flowers with yellow discs, borne on stout stems. Very early, heat resistant, and of easy culture with a long blooming season.

Pkt. 15c; 1/16 oz. 35c; ⅓ oz. 60c; ¼ oz. \$1.00;
½ oz. \$1.75; 1 oz. \$3.00

Verbena

Verbenas are spreading, bushy, with handsome foliage; which cover themselves with large heads of brilliant flowers in a variety of colors. After soaking in water forty-eight hours in a refrigerator, sow the seed where they are to flower, and thin to a foot apart in 2 foot rows. Ideal for borders and rock gardens.

MASTER MIXTURE

Pkt. 15c; 1/16 oz. 35c; 1/8 oz. 60c; 1/4 oz. \$1.00;
1/2 oz. \$1.75; 1 oz. \$3.00; 1/4 lb. \$10.00

Vinca or Periwinkle

A very pretty ornamental plant, with dark green foliage and dainty, bright flowers. Useful for bedding, edging, and massing. Sow where the plants are to bloom, and thin to about a foot apart each way. Makes an excellent ground cover for waste places. Does well in partial shade, and grows well on poor, sandy soil around beaches, where it is difficult to get other flowering plants to grow.

*Vinca or
Periwinkle*

PINK AND WHITE MIXED

Pkt. 15c; 1/16 oz. 30c; 1/8 oz. 50c; 1/4 oz. 75c;
1/2 oz. \$1.25; 1 oz. \$2.00; 1/4 lb. \$6.75

ZINNIA

The zinnia is one of the most easily grown flowers for Florida, thriving in almost any soil and under almost all conditions.

While seedling plants of zinnias can be transplanted, they do best when the seed is sown directly in the garden where the plants are to flower. Seeds should not be sown, however, until the soil has warmed up and danger of low temperatures is past. For best results, provide a rich, deep soil and give plenty of water when needed especially in blooming time. For the best development of plants, they should be given ample room to allow free branching for sturdy plant development, which will assure the production of large, well formed, double flowers. Pompons, Peppermint Stick and Persian Carpet should be spaced 12 inches apart in 2 foot rows, all other varieties 18 to 24 inches apart

in 3 foot rows. Successive sowings can be made all through the summer and as late as the end of August in Florida.

Zinnias are practically free from all plant diseases and insects. Late in their growth, however, they may be subject to powdery mildew, but if the plants are properly spaced so that a free circulation of air is possible, this trouble should not be serious. A dusting of sulphur will check mildew if applied in the early stages.

SUNBURST MIXTURE

Mixture of the finest colors and varieties of the Double Giant Dahlia-flowered type.

Pkt. 15c; 1/8 oz. 35c; 1/4 oz. 60c; 1/2 oz. \$1.00;
1/4 lb. \$5.00; 1 lb. \$18.00

Fantasy

The flowers of this group are double, of medium size, with shaggy petals that are tubular, curved or crested. Distinctly different from other Zinnias. An unusual range of colors.

FANTASY MIXTURE

Pkt. 15c; 1/8 oz. 35c; 1/4 oz. 60c; 1/2 oz. \$1.00;
1 oz. \$1.50; 1/4 lb. \$5.50

Giants of California

Large double flowers of a distinctive graceful shape. The flowers are usually brighter than the Dahlia-flowered type and nearly as large, but more flat. Plants are vigorous, well branched, grow about 2½ feet tall and produce many long, strong flower stems each crowned with a beautiful flower. Perfect blend of colors.

GIANTS OF CALIFORNIA SPECIAL MIXTURE

Pkt. 15c; 1/8 oz. 30c; 1/4 oz. 55c; 1/2 oz. 80c;
1 oz. \$1.40; 1/4 lb. \$4.75; 1 lb. \$16.00

Zinnias—Sunburst Mixture

ZINNIA—(Continued)**Giant Cactus Flowered**

BLAZE—The newest color in the Giant Cactus Flowered Class. Mandarin-red color, which changes to a deep warm orange as the flowers attain size. Large shaggy flowers 4 to 5 inches across, outstanding for uniformly-double flowers of gracefully quilled and twisted flat petals. A strong grower, free flowering, uniform plants. A delightful cut flower as well as unrivaled for mass displays.

Pkt. 15c; 1/16 oz. 75c; 1/8 oz. \$1.25; 1/4 oz. \$2.25;
1/2 oz. \$4.00; 1 oz. \$7.50

GIANT HYBRID MIXTURE—Plants are strong growing, free flowering, with long stems and good keeping quality for cut flowers. Flowers are very large with a pleasing variation in petal formation, mostly fluffy or ruffled, curled and quilled, free of the stiffness often associated with other zinnias. Large range of colors and color combinations.

Pkt. 15c; 1/8 oz. 50c; 1/4 oz. 75c; 1/2 oz. \$1.25;
1 oz. \$2.00; 1/4 lb. \$7.00

Giant Dahlia-flowered

The large flowers are fully double, with broad, undulating rays in magnificent solid colors. The plants grow 2 to 3 feet high.

CRIMSON MONARCH—Crimson or red.

WONDER ROSE—Light rose or pink.

POLAR BEAR—A large-flowered white Zinnia.

Price of each above

Pkt. 15c; 1/8 oz. 35c; 1/4 oz. 60c; 1/2 oz. \$1.00;
1 oz. \$1.50; 1/4 lb. \$5.00; 1 lb. \$18.00

Zinnia—Special Crown O' Gold Mixture

Crown o' Gold

The group is one of the most outstanding developments among Zinnias. The petals of all the flowers are overlaid with a deep golden yellow at the base, with the individual flower color at the tips.

SPECIAL CROWN O' GOLD MIXTURE—Colors include various shades of salmon, peach and buff.

Prices on each of the above:

Pkt. 15c; 1/8 oz. 35c; 1/4 oz. 60c; 1/2 oz. \$1.00;
1 oz. \$1.50; 1/4 lb. \$5.00; 1 lb. \$18.00

Pompon or Lilliput

(Baby Zinnia)

Plants are about 1½ feet high, dwarf, bushy and branching, bearing miniature flowers resembling pompon or button chrysanthemums. Charming for bedding. Plants make an excellent low edging or border for taller varieties. The small (1 to 1½ inches in diameter) double flowers are borne in great profusion, are small, compact, and symmetrical in shape. Excellent for cut flowers. Contains a large assortment of colors.

Zinnia
Pompon or Lilliput

Pkt. 15c; 1/8 oz. 30c; 1/4 oz. 55c; 1/2 oz. 80c;
1 oz. \$1.40; 1/4 lb. \$4.75; 1 lb. \$16.00

Peppermint Stick

A dwarf plant with combination of choicest colors in each medium size flower with striped petals. Heavy producers, especially nice for floral arrangements. Bloom over a long season. A wide range of colors, and various color combinations.

Pkt. 15c; 1/16 oz. 30c; 1/8 oz. 50c; 1/4 oz. 75c;
1/2 oz. \$1.25; 1 oz. \$2.00; 1/4 lb. \$6.75

Persian Carpet

All-American Winner

Early and easy to grow, heat-loving and colorful. Miniature, fully double flowers of well rounded form or ball-shaped in a sparkling range of variegated colors. Resembles tiny dahlias. Plants dwarf and compact, in a nice color range, thrive on heat and yield a wealth of blooms on 6 to 8" stems.

Pkt. 15c; 1/16 oz. 35c; 1/8 oz. 60c; 1/4 oz. \$1.00
1/2 oz. \$1.75; 1 oz. \$3.00

Be Sure To Include State Sales Tax When Ordering Rose Bushes.

ROSE BUSHES FOR FLORIDA

Plant any time between November 1 and April 1

Approximate time from setting out to bloom—Strong No. 1 grade bushes—2 months.

White American Beauty

Rose Growing in Florida— Eleven Suggestions

1. Locate the rose garden in a well drained spot where it will receive plenty of sunlight each day, and avoid the vicinity of trees and large shrubs.

2. Enrich the soil before planting, using a mixture of black loam top soil and Vigoro or Vertagreen fertilizer. (See page 32.) The loam should be thoroughly mixed with the plant food and allowed to stand at least one week before planting. The rose bed filled with this soil mixture should be at least 18 inches to two feet deep.

3. After setting bushes, fertilize with rotted stable manure, Vertagreen or Vigoro. (See page 32.) Pulverized sheep manure (see page 32), used at the rate of 2 to 3 pounds per plant.

4. Plant bushes 18 to 24 inches apart each way. Give climbers more room. Spread the roots carefully so they can develop freely. The roots should never be doubled up.

5. Plant at the same level that bushes stood in the nursery. Soil marks can be seen on the plant.

6. Use a heavy mulch of organic material, such as leaf mold, pulverized sheep manure, rotted stable manure, during the summer.

7. Fertilize every six to eight weeks during the growing season. One-half pound Vertagreen or Vigoro per bush is plenty for each application, along with a small shovelful of pulverized sheep manure. (See page 32.)

8. Water thoroughly at least once a week during the entire growing season.

9. When planting, prune the bushes back to about 10 inches. Prune or cut back twice each season. Remove dead, infected and weak wood. Give heaviest pruning when plants are dormant.

10. Watch for insects, such as aphids (plant lice), flower thrips, rose beetles, bugs, caterpillars, etc., and for diseases such as black spot, rose canker, and powdery mildew. Dust thoroughly with Kilgore's Rose Dust (see page 30) at least once every week or as soon as diseases or insects appear.

11. Replace weak, unthrifty plants, two or more years old.

Shipped Direct from Nursery. All orders will be shipped direct from the Texas nursery to the customer. It will require from a week to ten days from date of order to receive rose bushes, as it requires a little time to properly prepare rose bushes and make shipment.

Extra strong No. 1 grade bushes, any variety — Postpaid to any point in Florida

Orders accepted for shipments to start after October 15th. No shipment made prior to late October.

No order accepted for less than 5 bushes. However, this does not apply to patented roses.

RED-RED RADIANCE. (HT)—It has flowers of the same exquisite form and sweet fragrance as Pink Radiance. The color is an even shade of clear red. Red and pink radiance are the two best and most reliable varieties for Florida. They are continuous bloomers.

RED—ETOILE DE HOLLANDE. (HT)—The deepest red of red Roses. Large blooms and buds borne on long, strong stems. Highly recommended for Florida. Good branching plant.

RED — POINSETTIA. (HT) — Flowers of brilliant red. Huge, ideal long pointed buds. Vigorous tall grower, long stems. Fine for cutting.

RED—RED TALISMAN. (HT)—Glorious red color, prized for its long stems and pointed buds. Large blooms.

PINK—PINK RADIANCE. (HT)—A beautiful shade of the richest tone of pink, darker on the inner surface of the petals than on the margins. Buds are large and very fine. A very strong grower, and exceptionally well adapted to Florida.

PINK—EDITOR McFARLAND. (HT)—Large flowers, deep sparkling pink color, and are carried on long, strong stems on vigorous upright bushes.

PINK—BRIARCLIFF. (HT)—Fine for cutting. Large blooms of deep rose-pink, lighter on the outside. Very fragrant.

WHITE — WHITE AMERICAN BEAUTY. (Frau Karl Druschki). (HP)—Buds fine and large. A snowy white rose. Vigorous plant blooming profusely.

Rose Radiance

BUSH ROSES (Continued)

WHITE — CALEDONIA. (HT) — The long pointed buds and large double flowers are pure white, with curved and infolded flowers. One of the prettiest white roses. Plants bloom over a long period.

YELLOW—GOLDEN DAWN. (HT)—Large buds opening to full double sunflower-yellow flowers of delightful fragrance.

YELLOW—SOEUR THERESE. (HT)—The long pointed slender buds are of deep chrome-yellow touched with orange-carmine. Open flowers are of a rich daffodil-yellow. Heavy-foliaged plant of spreading habit. A continuous bloomer.

TWO-TONE—PRESIDENT HOOVER. (HT) —Cerise pink, flame scarlet and yellow. Large flowers with broad, thick petals, very fragrant. Clean handsome foliage. Long heavy cutting stems on a well branching plant.

TWO-TONE TALISMAN. (HT) — Presents unusual combination of orange and copper tones, suffused with pink. Truly multi-colored. Flowers are high centered, double, and quite fragrant.

Lawn and Golf Course Grasses for Florida

Pesticides, Fertilizers and Supplies Not Used for Agricultural or Commercial Purposes are Subject to State Sales Tax

All Grass Seed f.o.b. Plant City, except 1 lb. lots, which are Prepaid

Beautiful Lawns Can Be Grown in Florida

Starting the Florida Lawn

Previous to starting the grass, work into the soil as much organic matter as possible in the form of pulverized sheep manure, muck or woods mold. Broadcast pulverized sheep manure at the rate of two and one-half to five pounds per hundred square feet, before sowing the seed, or setting out the sprigs, wetting down the sheep manure well. Add 25 lbs. per 1000 square feet of a complete fertilizer mixture such as Vigoro or Verta-green or a commercial fertilizer mixture containing 6% of nitrogen to every thousand square feet of space. Work thoroughly into the soil, level before setting rooted runners or planting grass seed. Water and weed regularly until the grass is completely sodded. A thoroughly heavy watering, soaking the soil to a considerable depth every 5 to 7 days, is much better than a light watering daily. (See page 32 for lawn fertilizers.)

Top Dressing Florida Lawns

Proper fertilization of lawns is important. In general, Florida lawns should be fertilized three times a year—spring, mid-summer and mid-fall. Each application should distribute 20 to 25 lbs. per 1000 square feet of a complete fertilizer such as Vigoro or Verta-green. Apply fertilizer when the foliage is dry and water in to prevent burning of the grass. Pulverized sheep manure is very valuable for top dressing after the lawn is started. It is desirable to cover the entire lawn once or twice a year with pulverized sheep manure (see page 32 for lawn fertilizers).

Bermuda Grass

Unhulled—Sow 100 to 150 pounds per acre, or 2 to 4 pounds per 1000 square feet.

Hulled—Sow 75 to 100 pounds per acre or 1½ to 2 pounds per 1000 square feet.

Bermuda grass is generally considered to be a fine Florida grass for maintaining a beautiful lawn. It is of fine texture, can be maintained green practically the year around, is a rapid grower and produces a lush, green carpet of turf. However, it requires careful attention in maintenance. It prefers loam or clay loam soil and will grow well on sand or muck. 20 to 30 pounds per 1000 square feet of a complete fertilizer such as Vigoro or Verta-green should be applied twice a year. Frequent weeding is desirable. Although Bermuda grass will respond to watering, it will stand considerable drouth. A thorough watering every 5 to 7 days during periods of extended drouth should be sufficient. The grass must be clipped closely (¾ to 1 inch) and frequently. Bermuda grass will not grow in shade. It spreads by surface runners and by underground root stalks. See can be planted from March to November at the rate of 2 to 4 pounds per 1000 square feet.

UNHULLED BERMUDA GRASS SEED

1 lb. 75c; 10 lbs. \$4.30; 25 lbs. \$10.25;

100 lbs. \$40.00

HULLED BERMUDA GRASS SEED—The almost watertight husks of the seed have been removed, facilitating quicker, surer results, the seed germinating more uniformly and in a much shorter time with proper moisture conditions.

1 lb. 85c; 10 lbs. \$5.30; 25 lbs. \$12.75;

100 lbs. \$50.00

Pensacola and Argentine Bahia Grass for Lawns

For pastures—see page 44

Sow 100 to 150 pounds per acre or 2 to 3 pounds per 1000 square feet

These improved varieties of pasture grasses are sometimes used for low maintenance lawns. Will remain green most of the winter. Will tolerate dry or infertile soils, but make an open, generally less attractive turf or lawn than regular lawn grasses. Should not be mowed too close. They require fertilizer in mid-spring and late summer, with a complete fertilizer such as Vigoro or Vertagreen. They are susceptible to damage from salt spray, but are relatively free of insect and disease troubles. Spring and early summer are the best periods for planting.

Pensacola Bahia

1 lb. 75c; 10 lbs. \$4.00; 25 lbs. \$9.75;
100 lbs. \$37.50

Argentine Bahia

1 lb. 80c; 10 lbs. \$4.80; 25 lbs. \$11.50;
100 lbs. \$45.00

Italian Rye Grass

FLORIDA'S WINTER BLUE GRASS

Sow 250 to 300 pounds per acre
or 6 to 8 pounds per 1000 square feet

This is a most valuable and desirable fall and winter grass for Florida, but it does not make a permanent lawn. It dies out as soon as warm weather in summer comes on. For quick covering of lawns and golf courses in winter it is unsurpassed. Do not plant in Florida before October or later than March. It will make a vigorous, luxuriant growth throughout the fall, winter and early spring but must have plenty of water. A common practice in Florida is to seed Italian Rye grass on other brown lawns or in brown unsightly spots of old lawns in the fall and winter for a velvety green all-winter lawn. Plant ½ lb. to 100 square feet right on top of old lawn after loosening the surface soil. Keep soil moist until seed sprouts.

Write for Prices

Carpet Grass

Sow 100 to 150 pounds per acre
or 2 to 4 pounds per 1000 square feet

Carpet grass is particularly well adapted to low moist soils and does not require much fertilization, but needs plenty of moisture. This grass is not suited to drouthy conditions or to sweet soils high in pH. It turns brown in the winter, is not salt tolerant nor will it stand much shade. Keep mowed to a height of 2 inches. Plant in the spring from March to July, or in fall from October to December. For lawns and golf courses use 2 to 4 lbs. of seed per 1000 sq. feet.

1 lb. 65c; 10 lbs. \$3.30; 25 lbs. \$7.75;
100 lbs. \$30.00

For further information on Florida lawns write the Mailing Department, Florida Agricultural Experiment Station, Gainesville, Fla., for a free copy of Bulletin 118 entitled "Lawns in Florida."

Bitter Blue-stemmed St. Augustine Grass

Use one bushel of sprigs per 200 to 300 square feet.

This is one of the most popular lawn grasses for Florida. Quick to establish, rather coarse in texture, but easy to mow, and remains green the year around. Fertilize two or three times a year at the rate of 20 pounds per 1000 square feet with a complete fertilizer such as Vigoro or Vertagreen. St. Augustine is our best shade grass and will grow on alkaline as well as slightly acid soils. Very salt tolerant. Grown by vegetative propagation only. Sprigs should be planted in well prepared soil, setting about 6 x 9 inches apart.

For chinch bug control in St. Augustine lawns
see page 29.

BITTER BLUE-STEMMED ST. AUGUSTINE GRASS—SPRIGS OR ROOTS

1 bu. \$2.50; 5 bu. \$2.40 per bu.;
10 bu. \$2.25 per bu.

Not prepaid. Available April to November. Shipped only by express direct from the Florida Nursery.

Centipede Grass

Use one bushel of sprigs per 300 to 400 square feet. Sow 3 ounces seed per 1000 square feet.

Adapted to a wide range of soils including high sand hills, and will tolerate infertile acid soils, can get by on a minimum of fertilizer and water, and is relatively free of insect pests and diseases. Will not do well on alkaline or sweet soils. A light spring or fall application of a complete fertilizer such as Vigoro or Vertagreen—10 to 15 pounds per 1000 square feet, should be sufficient. The fertilizer should be watered in. It is quick to establish and easy to mow. Will turn brown during the winter, does not tolerate shade and salt spray. Can be grown by vegetative reproduction (sprigs) or from seed.

WRITE FOR FREE LEAFLET "HOW TO ESTABLISH AND MAINTAIN CENTIPEDE GRASS SEED"

Centipede sprigs or root runners 3 to 5 inches long should be planted in rows 10 to 12 inches apart, 4 to 4 inches apart in the rows. Insert sprigs in the ground, leaving about an inch showing. Cover with soil immediately to prevent drying out. Give frequent watering until plants are rooted firmly.

CENTIPEDE GRASS SEED

1 oz. \$1.00; ¼ lb. \$3.25; ½ lb. \$6.25;
1 lb. \$12.00 Postpaid

CENTIPEDE GRASS SPRIGS OR ROOTS

1 bu. \$2.25; 5 bu. \$2.15 per bu.;
10 bu. \$2.00 per bu.

Not prepaid. Available April to Nov. Shipped only by express direct from a Florida nursery.

Write Mail Order Department, Kilgore Seed Co., Plant City, Fla., for instructive folder on "Centipede Grass Lawns."

GENERAL INFORMATION

For Spraying & Dusting

When dusting or spraying, cover all portions of plants thoroughly, particularly the under sides of leaves. Do not dust or spray when windy, or when there is an extra heavy dew, as you cannot expect good coverage. When spraying, be sure that foliage is dry. Oil sprays can be injurious to some ornamental plants under certain conditions. Use them carefully in accordance with directions on labels. When using oil sprays, they should be applied with as much pressure as possible.

PESTICIDES FOR FLOWERS, LAWNS AND SHRUBS

See pages 45, 46, 47 for field crop pesticides.

Prices quoted are f.o.b. Plant City or Kilgore Stores unless specified prepaid. All prices are subject to change without notice. All Insecticides, Fungicides, Fertilizers, Garden and Lawn Tools or any supplies not used for Commercial Agricultural purposes are subject to 3% Florida State Sales Tax. Rate of sales tax—10c no tax; 11 to 35c—1c tax; 36 to 65c—2c tax; 66 to \$1.00—3c tax.

KILGORE'S KIL-CHINCH. Granulated. (Code No. V-2.) A very satisfactory chinch bug control in St. Augustine type of grasses. Furnished in a granular form, similar to coarse sea sand. The toxic ingredient is malathion. Apply at the rate of two pounds per 100 sq. ft. 5-lb. bag \$1.50; 10-lb. bag \$2.50; 50-lb. bag \$10.00; 100-lb. bag \$20.00.

KILCHLOR-40-W. — For the control of ants, chinch bugs, mole crickets, sod webworms, army worms and grubs. As the amounts necessary for control of the insects vary widely, labels attached to packages containing this material should be considered.

1 lb. 90c; 5-lb. bag \$3.35;
10-lb. bag \$6.50;
50-lb. bag \$25.50

KILGORE'S NEMA-KIL. (Contains Nema-gon). A new nematocide, which kills nematodes, including rootknot, sting nematodes, burrowing nematodes, stubby-root nematodes, etc. Can be used safely on many established plants, such as hibiscus, roses, gardenias, azaleas, ixoras, as well as lawn grasses and most flowers without harm to the plants or grasses. NEMA-KIL is emulsifiable in water and easy to apply. It is the answer to a long-felt problem as to how to get rid of nematodes in your yard without digging up lawns, shrubbery, etc. One quart of NEMA-KIL will treat from 600 to 800 square feet of surface.

Price: pt. 1.95; qt. \$3.30; 1 gal. \$10.00; 5 gal. \$47.50; 30-gal. drum \$282.00

KILCIDE 50-W.—(Contains 50% DDT Wettable powder.)

1-lb. can 70c

KILCIDE GARDEN DUST (D-11). (Containing 5% D.D.T.) for control of many insects on lawns, shrubs, flowers and vegetables. See label for directions.

5 lbs. 50c; 10 lbs. \$1.00; 25 lbs. \$1.65; 50 lbs. \$2.35

KILCHLOR DUST 5%. (Code No. H-1).—For the control of chinch bugs, army worms, sod webworms, and mole crickets. Rates of applications are suggested as follows: For chinch bugs use three to four pounds per 100 sq. ft. For worms use three pounds per thousand sq. ft. For the control of ants consult label.

1 lb. 15c; 5-lb. bag 75c; 10-lb. bag \$1.50;
25 lbs. \$2.50; 50 lbs. \$3.95

ORTHOCIDE 50-W (Containing captan). For the control of common lawn diseases caused by fungi.

4-lb. bag \$3.00; 50-lb. drum \$35.25

SABA CHINCH. (Code No. S-2).—For control of chinch bugs, army worms, sod webworms, and ants. Use 4 lbs. per 100 sq. ft.

5-lb. bag 75c; 10-lb. bag \$1.50; 25 lbs. \$3.10;

50 lbs. \$5.15; 100 lbs. \$10.30

PESTICIDES FOR FLOWERS, LAWNS AND SHRUBS—(Cont'd)

BLACK LEAF 40—For the control of aphids, thrips, leafhoppers, and other soft bodied sucking insects. Use two tablespoons per gallon of water.

1 oz. 49c; 5 oz. \$1.39; 1 lb. \$2.98; 2 lbs. \$5.29

KILGORE'S POISON BAIT NO. 11 (Code No. B-11) (contains toxaphene and chlordane)—This bait is specific against cutworms, also controls mole crickets and can be used to advantage where climbing cutworms are not a factor. Apply on ground. Do not throw this bait directly into plants as some damage might result.

1 lb. 15c; 25 lbs. \$2.30; 50 lbs. \$4.15

KILGORE'S KILCHLOR DUST and Gun. — (Contains chlordane.) As chlordane is a specific insecticide for ants, roaches and mole crickets, KILCHLOR DUST provides a practical control for these insects over a prolonged period of time.

Complete—each 75c; refills for dust gun (dust only) 1 lb. 25c

KILGORE'S ROSE DUST AND GUN.—A combined insecticide and fungicide for checking insects and diseases on roses. Applied once or twice at intervals of approximately seven days.

Gun complete with dust 75c. Refills for dust guns (dust only) 35c lb.

MALATHION SPRAY 50% — An especially effective material for the control of scale insects, mealy bugs, white flies, red spiders (mites) and aphids. Can be used at practically any time of the year. It can also be applied to the more delicate shrubs and flowers which are highly susceptible to oil injury. The material itself is toxic to human beings and warm blooded animals, but much less so than some other compounds, provided that caution statements shown on label are complied with.

1 oz. 49c; 5 oz. \$1.39; pt. \$2.69; qt. \$4.29

RED ARROW GARDEN SPRAY.—A safe, all around spray. Kills aphids, thrips, leafhoppers, caterpillars, red spiders and many other garden insects. Use at the rate of two teaspoons per gallon of water.

1 oz. 35c; 4 oz. \$1.25; 1 pt. \$3.30; 1 qt. \$6.30

IMPROVED ISOTOX GARDEN SPRAY M.—An especially effective spray containing lindane, DDD and malathion for control of chewing and sucking insects usually found on ornamentals. Use four tablespoons per gallon of water.

4-oz. bottle \$1.00; 8 oz. \$1.85;
16 oz. \$2.95

ORTHO-KLOR "44" — (Containing 44% Liquid Chlordane). Readily emulsifiable in water. For control of ants, mole crickets, cutworms, army worm, grasshoppers, roaches and many other insects.

4 oz. 90c; 8 oz. \$1.45; 16 oz. \$2.45; 32 oz. \$4.25

ORTHOL GARDEN SPRAY.—A modernized oil emulsion containing nicotine and DDT for the combined control of aphids, thrips, red spiders, mealy bugs and many other garden insects. Use at the rate of six tablespoons per gallon of water.

4 oz. 35c; 16 oz. 75c; 32 oz. \$1.25

VOLCK OIL SPRAY. — Especially designed for the control of scale insects, mealy bugs, red spiders and white flies on garden shrubs, palms and other ornamentals. Do not use this spray on cocos palms, maiden-hair fern, and other sensitive plants.

4 oz. 35c; 16 oz. 75c; 32 oz. \$1.25;
1 gallon \$3.00

KILCOP "45"—(Contains 45% metallic copper.) Kilcop is extremely fine. This fineness is essential for good coverage and effective control of fungi. Use 2 tablespoons per gal. of water.

1-lb. can 90c

DITHANE Z-78.—A fungicide which is specific for the control of petal blight in azaleas. Applications should begin when reddish fruiting bodies of the fungus appear on the ground. This treatment should be continued three times a week for a period of three weeks. Spray should be directed into centers of the flowers. Use two tablespoons per gallon of water or one pound per 50 gallons.

1 lb. \$1.50; 3-lb. bag \$2.55

C-M-Z GARDEN SPRAY—A combined nutritional and fungicidal spray for shrubs, fruit trees and vegetables. Use at the rate of two tablespoons per 1 gallon of water on Avocados, Mangos and shrubs, 1¼ tablespoons on citrus and 2½ tablespoons on vegetables. No additional spreader or wetting agent required.

1-lb. can 75c

PESTICIDES FOR FLOWERS, LAWNS AND SHRUBS— (Cont'd)

BUG-GETA PELLETS provide an easy way to kill snails and slugs.

12 oz. 50c; 2 lbs. \$1.00; 5 lbs. \$2.00

KILGORE'S SLUG DUST—A 15% Metaldehyde dust providing effective control of slugs in nurseries, greenhouses, etc. Use at the rate of 2 lbs. per 1000 square feet. Usually three applications are required.

1 lb. Canister \$1.00; 6-lb. bag \$3.30;
50 lb. Drum \$25.00

NO NIB'L RABBIT REPELLENT.—Recommended as a rabbit repellent for flowers, shrubs and other ornamentals. Non-injurious to birds and other animals. It is easy to use and is effective either as a dust or as a spray.

6 oz. shaker-top can 98c

HOUSEHOLD PESTICIDES

KILGORE'S KILCHLOR. A residual household spray. Contain 2% chlordane plus isobornyl thiocyanacetate, for control of roaches, ants, and most other household insects. Qt. 65c; gal. \$2.15.

KILSPRAY. An excellent indoor space spray for flies, mosquitoes, roaches, ants, fleas and certain other household insects. Not a residual spray. It should be used as necessary whenever insects are present. Qt. 65c; gal. \$2.15.

KILSPRAY INSECT BOMBS

Kills flies, mosquitoes, gnats, flying moths, roaches, ants and Silverfish.

Kills quickly. Easy to use.

Price 12 oz. Bomb. 97c prepaid

KILSPRAY — Air Freshener, Bombs

Stops all offensive odors anywhere. Quick and easy to use.

Non-toxic, non-inflammable.

Comes in two odors—Bouquet and Pine needle.

Price 10 oz. Bomb. 97c each.

DRY FLY BAITS.—For use against house flies and their maggots in out-buildings, kennels, around garbage cans, etc. Easy to apply—scatter by hand. No spraying equipment needed. Kills within a few minutes. Lasts for several days when applied to dry ground. Do not use inside of dwellings.

FLY FLAKES—Apply 4 oz. per 100 sq. ft. 1 lb. shaker can 98c; 2-lb. bag 89c; 5-lb. bag \$1.79; 10 lbs. \$3.25; 25-lb. drum \$6.00.

ORTHO FLY KILLER (Dry Bait)—Apply 4 oz. to 500 sq. ft. 1 lb. can 98c; 5-lb. bag \$1.98.

LAWN AND GARDEN SUPPLIES

TERRA-LITE (Vermiculite).—An excellent light weight medium for starting cuttings, seed in flats, paper pots or plant bands. Can be mixed with soil in seedbeds. Increases germination, eliminates damping off. Holds moisture for several days without watering.

4-qt. bag 39c; 1/2-bu. bag 89c; 4 cu. ft. bag \$2.35

HORMODIN POWDERS (Prepaid).—"Hormodin" is a hormone-like plant growth substance. Its principal use is to stimulate rapid root growth on cuttings.

No. 1—For Chrysanthemums, Poinsettias, Roses, etc.

1/4 oz. 25c; 1 3/4 oz. 50c; 1 lb. \$3.00

No. 2—For semi-woody plants and most common shrubs.

1 3/4 oz. 75c; 1 lb. \$4.50

No. 3—For resistant species, such as Evergreens and dormant cuttings.

1 oz. \$1.00; 1/2 lb. \$4.50

Combination Package, powders Nos. 1, 2 and 3, in carton, 75c

ROOTONE (Prepaid).—A hormone powder to hasten the rooting of cuttings.

1/4-oz. pkg. 25c; 2-oz. pkg. \$1.00; will treat up to 3,000 cuttings; Commercial pkg., 1 lb. \$5.00, will treat up to 30,000 cuttings.

TRANSPLANTONE (Prepaid). — Supplies the plant with chemicals which stimulate root formation and growth after transplanting time. 1 1/2 oz. makes five gallons solution.

1/2 oz. 25c; 3-oz. can \$1.00; 1-lb. \$4.00

SEEDTONE: SEED PROTECTANT. (Containing 50% captan)—A guard against seed decay, damping off and seedling blight.

1 oz. 25c

Moss

PEAT MOSS—Good to add humus and hold moisture in seedbeds. Also an excellent poultry litter. f.o.b. Plant City.

Georgia Peat Humus, 1 1/2-cu. ft. bag \$1.20

In Bales 5-cu. ft. of compressed Moss \$3.50

European Peat. Compressed in burlap wrapped bales 20"x20"x36" 7 1/2 cu. ft. each \$4.95; Bulk - 10c per lb.

SPHAGNUM MOSS. Burlap Wrapped Bales

14"x16"x45" \$4.25; Bulk - 50c per lb.

OSMUNDIA FIBRE — Used for growing Orchids.

Per Bales \$8.75

Bulk - per lb.35

SOLUBLE PLANT FOOD AND FERTILIZERS FOR LAWNS AND GARDENS

ADCO.—A clean odorless powder for converting leaves, grass clippings etc. into compost. 5 lbs. makes 200 lbs. organic compost.
5-lb. bag \$1.15; 20-lb. bag. \$2.85

ACTIVO. A compost activator. Converts compost quickly and easily into available plant food.

No. 2 Size for 350 lbs. of Compost\$1.00
No. 7 Size for 1200 lbs. of Compost 2.95

HY-GRO — Soluble Plant Food
—An excellent starter solution for potted plants, seedbeds and transplanting. Use at the rate of 3 tablespoons dissolved in 2 gallons of water (1 teaspoon in 1 quart of water).

3 oz. 35c; 1 lb. \$1.00; 2 lbs. \$1.45
5 lbs. \$2.15; 10 lbs. \$4.00
f.o.b. Plant City

GRO-CROP.—A liquid plant food containing the three major plant food elements. Nitrogen, phosphate and potash plus minor elements. Use 2 tablespoons per gal. water. f.o.b.

8 oz. 59c; 16 oz. 98c; 32 oz. \$1.79; 1 gal. \$4.25

HYPONEX.—A Good Starter Solution.—Especially valuable in seedbeds and to start plants off after transplanting. Contains many plant food elements plus Vitamin B¹. Dilute 1 oz. to 6 gallons of water.

1 oz. 10c; 3 oz. 25c; 7 oz. 50c; 1 lb. \$1.00;
10 lbs. \$8.00 Postpaid

PLANTABBS FOR HOUSE PLANTS.—Plantabbs are a complete, balanced plant food. Use for indoor potted plants. Excellent for garden flowers and vegetables. Plantabbs with Vitamin B¹ make stronger root growth.

10 Tablets 10c; 30, 25c; 75, 50c; 200, \$1.00;
1,000, \$3.50 Postpaid

VHPF.—"VIP"—is an instantly soluble fertilizer—containing the three major plant food elements, plus minor elements. Used as a starter solution and side dresser. Compatible with insecticidal and fungicidal sprays. Use 1 tablespoonful per gal., 1 lb. to 20 gals. and 6 lbs. per 100 gals. water.

1-lb. can 50c; 3-lb. bag 75c; 30-lb. bag \$7.20
f.o.b. Plant City

CAMELLIA AND AZALEA PLANT FOOD
—A special prepared fertilizer for camellias and azaleas. Containing the three primary plant foods, plus secondary elements.

5 lbs. 58c; 10 lbs. \$1.05; 25 lbs. \$1.90;
100 lbs. \$5.75. f.o.b. Plant City

VERTAGREEN—is a high quality, scientifically blended plant food, for lawns, flowers, shrubs, trees, vegetables.

Price per lb. 15c; 5 lbs. 55c; 10 lbs. 95c;
25 lbs. \$1.70; 50 lbs. \$2.55; 100 lbs. \$4.85;
f.o.b. Plant City, or Kilgore Stores

VIGORO—Complete balanced plant food supplies the nutritional elements plants must get from the soil for best growth and development.

1 lb. 15c; 5 lbs. 55c; 10 lbs. 95c; 25 lbs. \$1.70;
50 lbs. \$2.55; 100 lbs. \$4.85 f.o.b.

PULVERIZED SHEEP MANURE. — For Flowers, Shrubs and New Lawns use 10 to 12 pounds per 100 square feet and rake into the surface soil. On old lawns use 8 to 10 pounds scattered broadcast and wet down with a hose.

10-lb. bag 70c; 25-lb. bag \$1.00; 50-lb. \$1.75;
ton \$67.50 f.o.b.

DAIRY ORGANIC COMPOST

High in bacteria. Supplies humus and organic plant food so greatly needed in most Florida soils. Excellent for starting lawns, flowers, shrubs and garden vegetables. Odorless, and will not burn. Weed seed is destroyed in processing.

Use 20 to 25 lbs. per 100 square ft. 5-lb. bag 65c; 50-lb. bag \$2.50; ton \$80.00 f.o.b.

ALUMINUM SULPHATE. For increasing acidity of soils where aluminum toxicity is no factor. 10c per lb.; 100 lbs. \$4.00 f.o.b.

ES-MIN-EL. For spray or dust. For spray use 4 lbs. to 100 gals. water. For dust use 16 lbs. Es-Min-El mixed in 84 lbs. of talc, clay or other inert ingredients. Price: 4-lb. bag \$1.60; 50-lb. bag \$14.00. f.o.b. Plant City.

ES-MIN-EL.—Contains many essential mineral elements in proper proportions. Add to ordinary fertilizers at rate of 1 lb. or 2 lbs. to 10 lbs. regular fertilizer or 100 to 200 lbs. per ton of regular fertilizer.

5-lb. bag \$1.05; 100-lb. bag \$10.50; f.o.b.

KILGORE'S IRON-AID. — (Contains Versen-ol, a newly developed chelated iron compound, which is completely available to plants under most soil conditions) — Designed for the correction of iron chlorosis wherever symptoms are indicated in flowers or shrubs. These symptoms indicate a tendency of paling the areas between leaf veins, while the veins themselves still retain their original green color.

We suggest the use of it in all cases where iron chlorosis is indicated as well as in questionable borderline cases. Consult label for specific directions before applying.

1 lb. 60c; 5 lbs. \$1.25; 10 lbs. \$2.00; 25 lbs. \$3.75;
50 lbs. \$5.90; 100 lbs. \$11.80 f.o.b.

VERSEN-OL—A chelated iron compound for soil application—soluble in water. Not recommended for foliar applications.

1 lb. can\$2.98 f.o.b.

VEGETABLE SEEDS

We List Only the Most Desirable Varieties for Florida.

All prices are subject to change without notice.

Write for Prices on Larger Quantities

*Tenderlong 15 (Improved Tendergreen Type)
(Mosaic Resistant)*

String or Snap Beans

Our bean seed is first class, high germinating, western-grown stock.

Plant 3 pecks (45 lbs.) to 1 bushel (60 lbs.) per acre. In the garden make four plantings at different times. Plant ½ lb. to 100 ft. of row at each planting.

The average number of days to picking is indicated in parentheses after each variety.

Bean prices quoted are f.o.b. Plant City, except 2 lb. lots or less, which are postpaid. 1 bushel weighs 60 lbs.

Snowdrift Cauliflower

Cauliflower

Sow six to eight ounces in seedbed to plant an acre. For the garden sow 1 packet in protected seedbed for thirty plants to set 50 feet of row.

Prices quoted are postpaid. Write for prices on larger quantities.

The number of days in parentheses after variety indicates the number of days to produce edible heads from setting out plants in the field or garden. About 35 days are usually required from sowing seed until plants are ready to set in the field or garden.

	Pkt.	½ Oz.	Oz.	¼ lb.	1 lb.
Snowdrift

White Vienna (50 days from seed sowing to edible stage)10	.20	.60	2.00	1.90

Great Lakes Lettuce

Lettuce

Sow $\frac{1}{2}$ to 1 pound in seedbed to plant an acre, or plant 2 to 3 pounds per acre in field. For the garden make two plantings at different times. Sow 1 packet in seedbed for 60 to 80 plants to set 50 to 75 ft. of row at each planting.

Culture. First sowings are made in Florida the beginning of September and continue until March. Low, damp soil is best suited for this crop. Lettuce must be grown rapidly in order to give it size, tenderness, crispness and high edible quality. Therefore, the land must be highly fertilized and moist. In Florida about one ton per acre of 4-7-5 fertilizer is commonly used for the Boston, Romaine and leaf types, where 800 to 1200 pounds per acre of a 4-8-8 fertilizer is recommended for the Iceberg type. Broadcast the seed on good moist seedbeds that have been thoroughly prepared, or sow in rows six inches apart and use a light roller to press seed into soil. A pound of seed sown broadcast plants a bed three feet by a hundred yards. Place burlap or well-washed old fertilizer sacks over the beds until seeds sprout. Seedbeds should be kept thoroughly moist at all times after the seed is planted.

The number of days in parentheses after each variety named represents the average time required to develop marketable heads from the planting of seed in seedbed or in the field.

Prices quoted are postpaid. Write for prices or larger quantities.

Rape	4-8 lbs.	Sept.-Mar.	
Rye	56 lbs.	14-56 lbs. Sept.-Jan.	
Sunflower	6 lbs.	Mar.-Sept.	

Pasture Grasses

(For Fall Planting in Florida)

Good winter pastures in Florida will be more important in 1956 and 1957 than in many years because of the large number of livestock and the limited feed supplies.

BERMUDA GRASS (Unhulled)—For pasture, sow 25 pounds per acre. For lawns or golf courses, where a heavy thick sod is desired, sow 100 lbs. per acre, or 2 to 4 lbs. per 1,000 square feet.

1 lb. 75c; 10 lbs. \$4.30; 25 lbs. \$10.25;
100 lbs. \$40.00

HULLED BERMUDA GRASS—Sow 1 to 2 pounds to each 1,000 square feet of lawn.

1 lb. 85c; 10 lbs. \$5.30; 25 lbs. \$12.75;
100 lbs. \$50.00

CARPET GRASS—For pastures sow 25 lbs. of seed per acre broadcast. For lawns or golf courses, sow 2 to 4 lbs. per 1,000 square feet.

1 lb. 65c; 10 lbs. \$3.80; 25 lbs. \$7.75
100 lbs. \$30.00

ITALIAN RYE GRASS—For grazing or hay, sow at the rate of 50 lbs. per acre. For lawns or golf courses, sow 250 to 300 lbs. per acre, or 6 to 8 lbs. per 1,000 square feet.

Write for prices

BAHIA GRASS—For pasture sow 15 to 20 pounds per acre.

COMMON, 1 lb. 60c; 10 lbs. \$2.80; 25 lbs. \$6.50;
100 lbs. \$25.00

PENSACOLA, 1 lb. 75c; 10 lbs. \$4.00; 25 lbs. \$9.75;
100 lbs. \$37.50

ALFALFA—HAIRY PERUVIAN—A valuable forage and hay crop for cattle in central and south Florida. Does best on dark sandy and muck soils not subject to flooding. Soil should have a pH of 6.5 to 6.8. Lime heavily if necessary. Sow 20 lbs. double inoculated seed per acre.

1 lb. 75c; 10 lbs. \$4.50; 25 lbs. \$10.75;
100 lbs. \$42.00

Clover—For Fall Planting

WHITE DUTCH CLOVER (La. Grown) — Recommended especially for mixtures with Bermuda Grass in perennial pastures.

Sow 4 to 6 lbs. per acre alone, or 2 to 4 lbs. per acre in a mixture.

Write for prices

SWEET CLOVER

HUBAM—Sow 8 to 12 lbs. per acre.

1 lb. 60c; 10 lbs. \$2.50; 25 lbs. \$5.75
100 lbs. \$22.00

FLORANNA—Sweet Clover (New)—Adapted especially to Florida.

1 lb. 65c; 10 lbs. \$3.10; 25 lbs. \$7.25;
100 lbs. \$28.00

Lupines—For Fall Planting

See Seeding Rate in table above

BITTER BLUE (For cover crop only.) — A great winter legume soil builder.

Write for prices

SWEET BLUE

Write for prices

SWEET YELLOW. Write for Prices.

Sweet Blue and Sweet Yellow are dual purpose crops, good for pasture and soil building.

OATS

Sow 5 pecks (40 lbs.) per acre in drills. Broadcast 2 to 2½ bu. per acre. A bushel weighs 32 lbs.

SOUTHLAND (Disease Resistant) (125 days) —For early grazing or for grain.

1 lb. 35c; 2 lbs. 50c; 8 lbs. (pk.) 60c;
32 lbs. (bu.) \$1.75

FLORILAND (New) (Disease Resistant) (115 days)—Excellent for early grazing.

1 lb. 35c; 2 lbs. 50c; 8 lbs. (pk.) 70c;
32 lbs. (bu.) \$2.00

SEMINOLE (New) (Disease Resistant) (110 days)—Good for early grazing and for early grain.

1 lb. 40c; 2 lbs. 65c; 8 lbs. (pk.) 80c;
32 lbs. (bu.) \$2.50

RYE

Sow 2 pecks in drills, 3 feet apart; for pasture broadcast 1 bushel per acre. A bushel weighs 56 lbs.

Abruzzi, write for prices.

Florida Black, write for prices.

SPECIAL NOTICE: Remittances should be made by postal money orders, checks, or cash. **DO NOT SEND STAMPS.** On items not marked postpaid be sure your remittance includes the necessary amount for postage and also the "State Sales Tax" on non-exempt merchandise.

We warrant that the seeds, bulbs and plants we sell are, at the time of delivery, as described on the container within recognized tolerances; but we limit our liability on this warranty to the amount of the purchase price of such seeds, bulbs and plants. We give no other or further warranty express or implied. THE KILGORE SEED COMPANY.

Notice of any defect or variation resulting from the failure of any seed to be as represented must be given within a reasonable time and not later than 15 days from the time such defect or variation becomes apparent and is observed by the purchaser. The Kilgore Seed Company, Section 578.26, Florida Statutes.
